System & Software Engineer - dimasrizqi.medium.com

WHAT I HAVE DONE

- BUILDING WEB APPS
  create a website application system that can make it easier for humans to do work, increase productivity, streamline work time, get real time and online reports. Create executive dashboard to show the trends

- BUILDING MOBILE APPS
  create a mobile application system using dart and flutter framework with high performance and beautiful layout. Can compile to android & ios apps.

- CONTAINER USING DOCKER & KUBERNETES
  building architechture as a service and modular using container.

- DEVOPS - CICD
  Setup devops environment with CICD method to automate repetitive jobs, make application modular and scalable, create monitoring pods to measure de service.

- IT SECURITY
  Successful cyber security programs are built with 3 component people, technology & knowledge. Keep update about security and get the patch immediately to secure the bussiness

- DESIGN, BUILD, THROUBLESHOOT COMPUTER SERVER
  My experience with computer server from 2008 make me familiar with setup pc, installation linux & windows server. Create system as a service who can serve the application over the network make it reliable, fast and strong

- DESIGN, BUILD, THROUBLESHOOT COMPUTER NETWORK
  My experience with computer network from 2008 make me familiar with network computer such as setup the network, routing, mpls, nat, etc. Setup mikortik router, setup cisco router & switch, setup wirelss app ubnt, ruckus, engenius, cambium etc, I can troubleshooting the failure network and get it done
